## DETAILED ACTION

### *Specification*

1. The amendment filed 04/26/2005 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: wherein  $R^{18}$  in formula (16) is defined by the variable "2b". While the variable "l" has been redefined as "b", there is no support in the originally filed specification for  $R^{18}$  in formula (16) to be defined by "2b" ("2l"), or for "b" ("l") to be defined as "an integer of 0-1".

Applicant is required to cancel the new matter in the reply to this Office Action.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-15 and 18-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no disclosure in the originally filed specification for wherein in claim 1, from which the balance of the claims

Art Unit: 1713

depend,  $R^{18}$  in formula (16) is defined by the variable "2b". While the variable "l" has been redefined as "b", there is no support for  $R^{18}$  in formula (16) to be defined by "2b", or for "b" to be defined as "an integer of 0-1".

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-15 and 18-20, claiming both the product and the process for producing the product in this invention, are rejected under 35 U.S.C. 103(a) as being unpatentable over Ikematsu et al. (JP '103 or JP '406) in combination with Tsujimoto et al., for reason cited in the previous action.

### ***Response to Arguments***

6. Applicant's arguments and Declaration filed 04/26/2005 have been fully considered but they are not persuasive.

7. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208

Art Unit: 1713

USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

8. Regarding applicant's declaration, applicant has only demonstrated possible additional advantages which would flow naturally from following the suggestion of the prior art (Tsujimoto et al.) to include the aluminoxane catalyst component (c) in the catalyst mixture of components a, b and d, in order to reduce the molecular weight distribution of the diene polymer while increasing the molecular weight (see Tables 1, 3 and 6 of Tsujimoto et al.) and the suggestion in the prior art (Ikematsu et al.) to after treat the resulting diene polymer resulting from such catalytic polymerizations with the carboxylic acid compound in order to have lower solution viscosities [see the abstracts of Ikematsu et al. (JP '103 or JP '406)]. Regardless of whatever additional advantage applicant may have discovered from the process suggested by the prior art, it cannot be the basis for patentability when the combination of the references would have been otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 1713

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
